Re: Continuing Review # PR20-003312-02

Application Title: Expanded Access to Convalescent Plasma for the Treatment of Patients with COVID-19

IRB#: 20-003312
The following is an excerpt from the minutes of the Mayo Clinic Institutional Review Boards (IRB Friday) meeting dated 3/25/2022:

**DECISION:** The Committee reviewed the continuing report and approved the continuation of the above referenced study. This approval is valid for one year, unless during that time the IRB determines that it is appropriate to halt or suspend the study earlier. IRB approval will expire on March 24, 2023.

**REVIEW:** The Committee noted 105,717 subjects have been accrued to date. The Committee accepts the appointment of the Mayo Clinic IRB as the IRB of Record for the Relying Organization of all sites agreeing to participate via the uncovidplasma.org website, and notes receipt of the fully executed IRB Authorization Agreement.

**CONSENT:** The Committee noted that as the study is closed to enrollment, the consent form will not be issued.
