Discharge/No Transfusion Form Quick Reference

Intended User: Physicians, Nurses, Research Coordinators, Support Personnel

If your patient is discharged or you decide not to transfuse the plasma, click the “Begin survey” button next to the text label “Discharge/No Transfusion Report Form.”

Confirm the information is correct.
If plasma was NOT given or NOT ordered, select the option to explain the circumstances.

If the patient was discharged, provide the discharge date.

If the patient was in one of the following conditions PRIOR to the first transfusion you will be asked if and when those conditions resolved (ICU, oxygen support or mechanical ventilation). Provide any additional improvement outcome information as applicable. Selecting these options will prompt additional requests for resolution dates to appear.

Select “Submit” when you complete this form, as that is the only way to receive an email confirmation. You may return to edit this form later if needed.
